## PROFESSIONAL SUMMARY

---

I am an aspiring AI and Machine Learning professional with a strong focus on AI, LLMs, and deep learning. Currently pursuing a B-Tech in Artificial Intelligence and Data Science, I have hands-on experience through internships and projects that leverage cutting-edge technologies to create innovative solutions. My goal is to contribute to real-world AI applications while enhancing my skill set and knowledge in AI and ML domain.

## ACADEMIC QUALIFICATIONS

---

### Velalar College of Engineering and Technology

Erode

B-Tech (Artificial Intelligence and Data Science)

(At present)

## TECHNOLOGIES

---

- **Programming Languages:** Python, Core Java, MySQL
- **AI Tools & Frameworks:** GenAI, Prompt Engineering, Machine Learning, TensorFlow, OpenCV, Hugging Face Transformers, PyTorch, OLLAMA
- **3D Tools:** Blender, Adobe Aero
- **Utilities & Platforms:** RPi4 model, CLI Tools, Canva

## INTERNSHIP

---

### Lennox India Technology Centre Pvt Ltd, Chennai — *ML Intern JUN 2025-JUL 2025*

- Engineered and deployed an offline LLM system for summarizing FEA reports, cutting information retrieval time from **hours to minutes**.
- Collaborated with a **2-member team** to design AI-driven solutions, improving **retrieval efficiency by 40%** through data-driven problem-solving. [Internship Certificate](#)

### Infosys Springboard, Online — *AI Intern*

OCT 2024-DEC 2024

- I Developed interactive storytelling, NLP, and dynamic content generation, boosting user engagement through personal and immersive storytelling. [Internship Certificate](#)

## PROJECTS

---

- **Plant Disease Detector:**  
**Technologies used:**(CNN)  
Integrated a CNN-based plant disease classifier into a mobile application, enabling farmers to quickly identify potential issues in the field with a 90% satisfaction rate based on user feedback.
- **COPS in Cars:**  
**Technologies used:**(YOLO V5, RPI 4 modelB, Arduino IDE)  
AI-Engineered a real-time AI accident detection system utilizing sensor data, reducing accident response time by two minutes and enabling faster dispatch of emergency services. Supports 2-way communication and real-time response. [Link](#)

## SKILLS

---

- Leadership
- Self-Learning
- Adaptability
- Team Collaboration
- Quick learning
- Time Management

## CERTIFICATIONS & COURSES

---

- Principles of Generative AI – Infosys Springboard [Certification](#)
- Artificial Intelligence Primer – Infosys Springboard [Certification](#)
- Privacy and Security in Online social media – NPTEL (Jan–Apr 2024) [Course](#)
- Introduction to Industry 4.0 – NPTEL (Jul-Oct 2024) [Course](#)

## ACHIEVEMENTS

---

- Scored 70.6% in TCS ION NQT-IT [Result](#)
- Participated in pals Innova! 2025 Competition conducted by IIT Madras
- First Prize – Project Expo for *COPS in Cars (AI Agent)* (2025)

## INTERESTS

---

- Artificial Intelligence Research
- AI Model Development

## DECLARATION

---

SUTHESHA hereby declare that the above information is true to the best of my knowledge and belief.
